Dear Chapter Member,

As we ring in 2018, exciting things are happening with the Energy Services Coalition all around the nation. In 2018 the ESC will hold its Seventh Annual Market Transformation Conference in Atlanta, Georgia. Stay tuned for more updates.

For our Nevada members we present this "Year In Review" as a sampling of the performance contracting stories in Nevada during 2017. To stay up-to-date, or to share a news item with us – please visit the [Nevada ESC Chapter Facebook](#) page.

The Nevada ESC Chapter has a year-end balance of \$5,620 in the Chapter's account to provide education and develop and disseminate information to increase the delivery of energy efficiency through a guaranteed energy savings performance contract.

For ideas on Chapter activities we encourage NV ESC Chapter members to check out the [ESC Chapter Playbook](#) on our website. The Playbook is a living document that represents examples of successes and challenges among state ESC Chapters around the country. The Playbook outlines activities and approaches these ESC Chapters have engaged in support of a statewide public programs to increase GESPC activity.

Happy New Year,
Jim Arwood
ESC Executive Director

David Wyllie
Celtic Energy Inc.
dwyllie@celticenergy.com

ESC Public Sector Chair, Kelly Thomas, delivers the official Welcome at the 6th Annual ESC Market Transformation Conference in Henderson.

We need your involvement.

If you are a former Nevada Chapter member, then you know that the ESC provides a unique forum in which all stakeholders can work together to address and overcome any barriers which are limiting the effective use of ESPC. So, if you are still involved in energy savings performance contracting programs, products or services, then coming back to the Energy Services Coalition may be right for you. Please consider [renewing](#) your membership. I hope you will be able to (re) join us!

August 9-11, 2017: The ESC and the Nevada ESC Chapter hosted the 6th Annual Market Transformation Conference in Henderson, Nevada. The conference was attended by more than 125 people from 35 states. Presentations have been posted to the website.

April 10, 2017 * Carson City School District, in partnership with McKinstry, has begun a series of building modernizations that will save the district \$357,000 annually through a \$6.1 million/18 year GESPC project in eleven different campuses.

Carson City School District is also set to launch McKinstry's three-year educational-focused energy awareness and operational efficiency program called powerED. The program engages students, staff and faculty across the district in energy, water and waste conservation efforts. This program will augment the district's cutting-edge Science, Technology, Engineering and Math (STEM) initiatives.

February 17, 2017:

The Nevada Chapter, together with the Governor's Office of Energy, held a half-day workshop at Reno's Innevation Center. The workshop focused on performance contracting and the benefits of utilizing GOE's Performance Contract Audit Assistance Program (PCAAP). Since the inception of PCAAP in 2014, the GOE has awarded \$1.1 million to accelerate performance contracting and expects to provide

more than \$890,000 in incentives which will lead to \$38.3 million in performance contracts in FY 2018.

The half-day workshop featured a powerful keynote address from Adam Kramer, Executive Vice President of Strategy for Switch, the nation's greenest IT company.
