June 15, 2009

Members of the municipal community:

Since our inception in 1992, Government Capital Corporation has been an aggressive financial source within the guaranteed energy performance contracting industry.

Although there is much turmoil within the financial community, our commitment to performance contracting has not changed. As an active member of the Energy Service Coalition, we are still, and will continue to do so, actively and aggressively pursuing the financing of performance contracting throughout the country.

We work not only with the major providers throughout the country, but with local contractors as well. Our goal is customer satisfaction. Whether that means extended term financing or delaying the first payment into the next budget year, we will do what it takes to earn your business.

Please feel free to look us up at www.govcap.com and take three minutes to review our video that discusses more fully the benefits of working with Government Capital.

Sincerely,

Timothy A. Borger
Public Finance
